- Wisconsin

First Re-TRAC Client in Canada

- Province of Manitoba

Re-TRAC™ is a powerful web-based system for managing recycling and solid waste program information.

Use Re-TRAC to *collect, organize, analyze, and report* on waste disposal and recycling programs with unprecedented speed, ease, and accuracy at a fraction of the cost of traditional reporting methods.

Re-TRAC's breakthrough technology delivers unparalleled results in these three critical areas of program management:

COLLECT

Re-TRAC comes equipped with many features to simplify the data collection process. Standard features make it possible to gather data on-line from:

- ▶ Communities
- ▶ Landfills
- ▶ Transfer stations
- ▶ Haulers
- ▶ Generators
- ▶ Processors

Efficiently access and update program information anywhere at anytime.

ORGANIZE

The Re-TRAC system offers a user-friendly interface that makes it easy for anyone to manage data from any sector, including:

- ▶ Residential
- ▶ Commercial
- ▶ Industrial
- ▶ Institutional

Organize data by jurisdiction, material, type of program, financial information, etc. through a secure, searchable database.

ANALYZE and REPORT

Detailed, comparative analysis is now a mouse click away with Re-TRAC. With a suite of versatile tools, Administrators now have the power to instantly generate:

- ▶ Trend analysis
- ▶ Annual state reports
- ▶ Regional comparisons
- ▶ Program performance analysis
- ▶ Internal planning reports
- ▶ Hundreds of charts and graphs

Unparalleled flexibility at your fingertips with over 70 pre-programmed report templates.

What Our Clients Are Saying About Re-TRAC:

JEFF TRAVIS
*Environmental Health
Manager*
Washington County, MN

"Since we started using Re-TRAC, staff time has been redirected to more productive activities, such as analyzing the data and acting on the results. In addition to this direct value, our staff is happier with this system too."

HOLLY CHRISTMANN
Program Manager
Hamilton County Solid Waste
Management District, OH

"Far and away, the most impressive attribute of the system is that it allows us to do, in seconds, the type of analysis that used to take us hours if not days."

CYNTHIA MOORE
*Recycling Team Leader,
Program Coordinator*
Wisconsin Department of
Natural Resources

"Re-TRAC's simple but comprehensive on-line tracking system enables communities to monitor and improve their recycling and waste management performance. Re-TRAC represents a significant step in developing this capability that has been sorely lacking."

LAWRENCE E. HOLLEY
*Manager, Division of Waste
Minimization and Planning*
Pennsylvania DEP

"This data management system will be of great benefit to our counties and municipal governments as they strive to make recycling a sustaining enterprise. With the many different approaches to recycling collection in Pennsylvania, we feel that Re-TRAC will help identify and promote the best collection practices."

Re-TRAC can be configured to include valuable *EXTRA FEATURES*:

- ▶ **TRANSACTION SYSTEM** - Import weigh scale data directly from landfills, transfer stations, and processors. The information will automatically populate appropriate program totals.
- ▶ **ON-LINE SURVEY SYSTEM** - Survey responses are automatically tallied and analyzed for commercial business, industrial operations, haulers, institutions, and processors.
- ▶ **ON-LINE HHW APPOINTMENT SYSTEM** - Allow residents to register on-line for appointments to drop-off hazardous materials, send automated confirmation emails with site & fee details, and automatically tally material totals.
- ▶ **INSTITUTIONAL SYSTEM** - Collect, organize, analyze, and report waste and recycling data from your college, university, hospital, or any other institution. Information can be organized and aggregated by dumpster, building, or department in addition to campus-wide or multi-campus summaries.
